Kitten Journey

From the first hint of kittens to the day they go home.

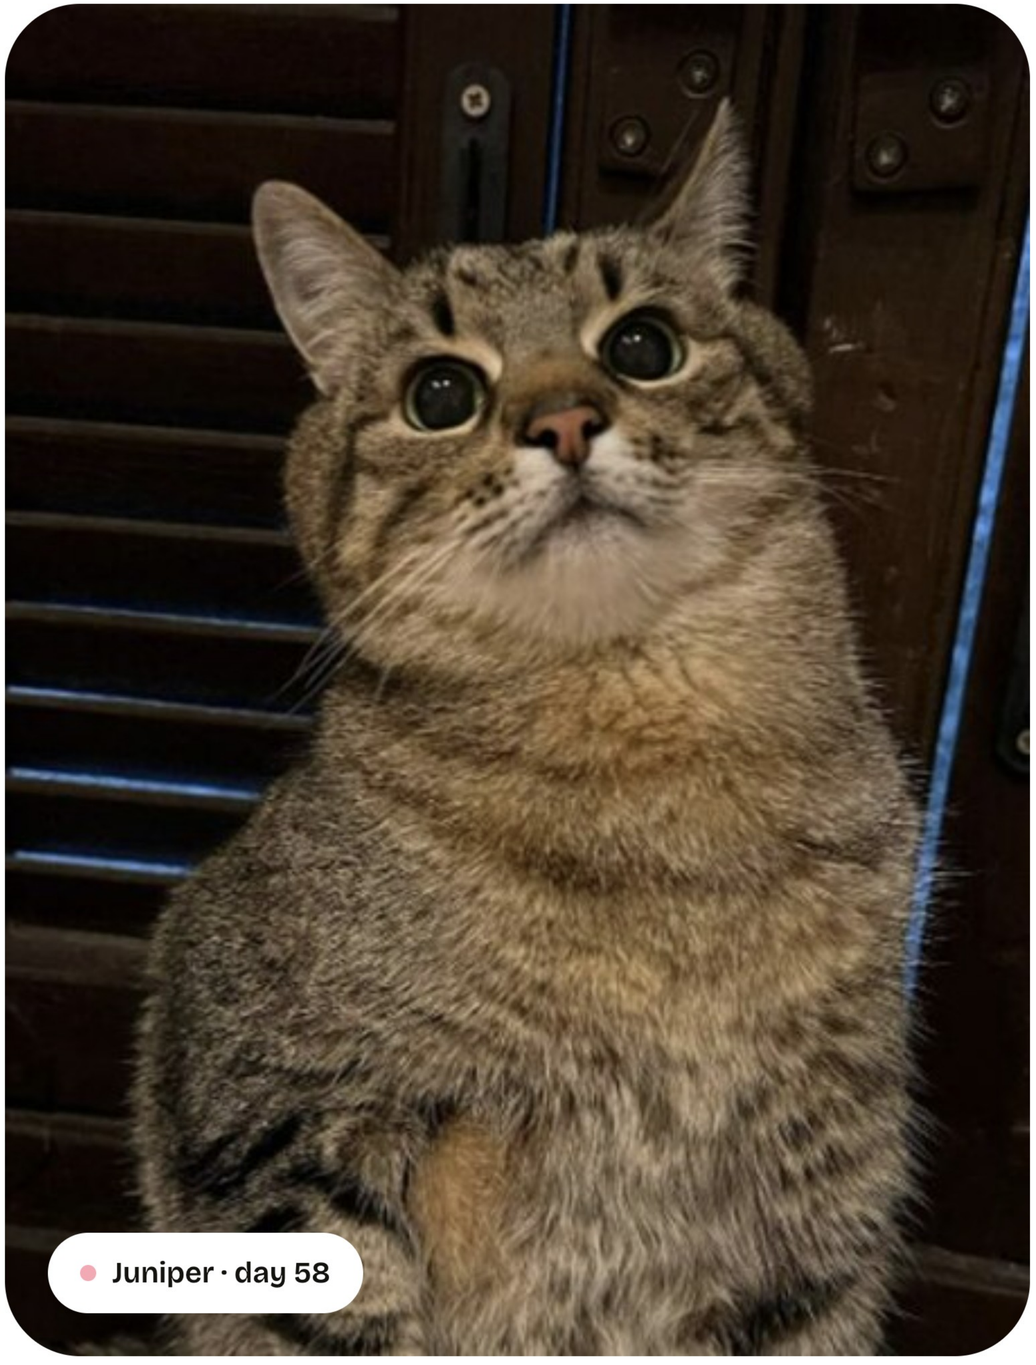

A calm companion for first-time cat families.

Your cat is having kittens. Now what?

Most people meet a litter once in their life. Nobody hands you a guide.

- Notes everywhere
- 3am googling “is this normal?”
- Software built like a spreadsheet

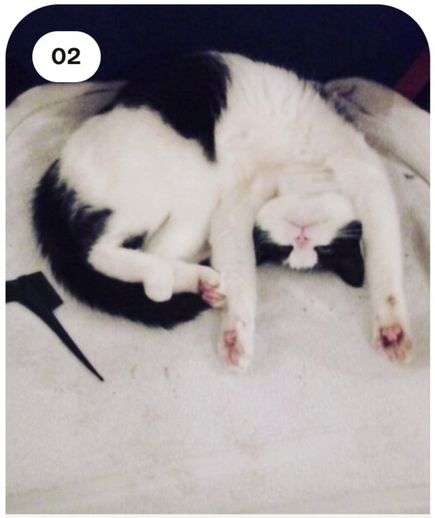

One calm companion.
Five chapters.

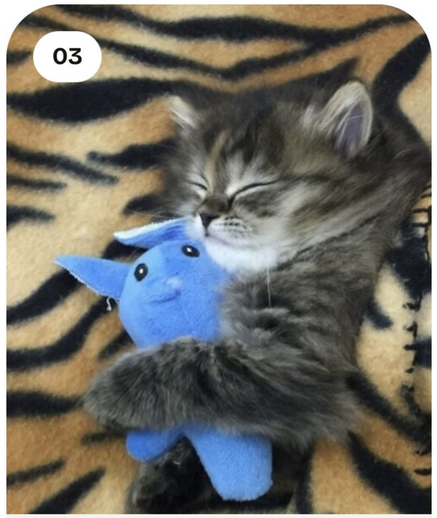

Expecting

A two-tap daily check-in

Birth

One kitten at a time

Newborns

Every gram counted

Growing

Firsts, gathered

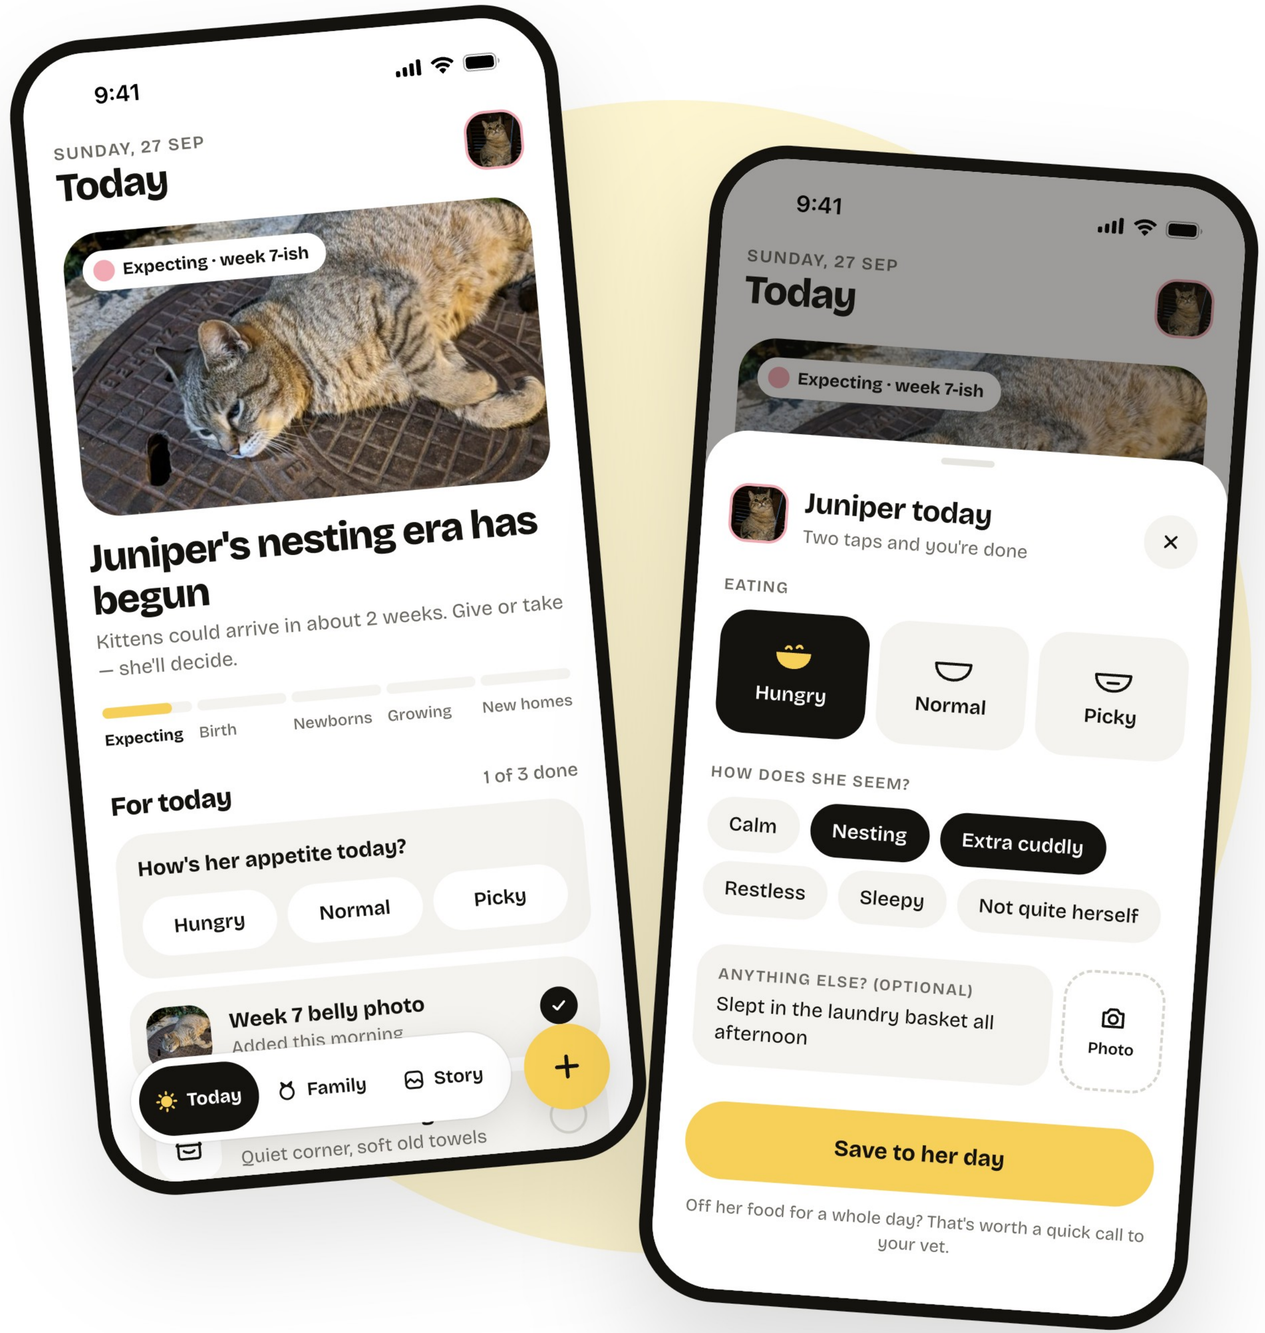

New homes

Their story, shared

Two taps and you're done.

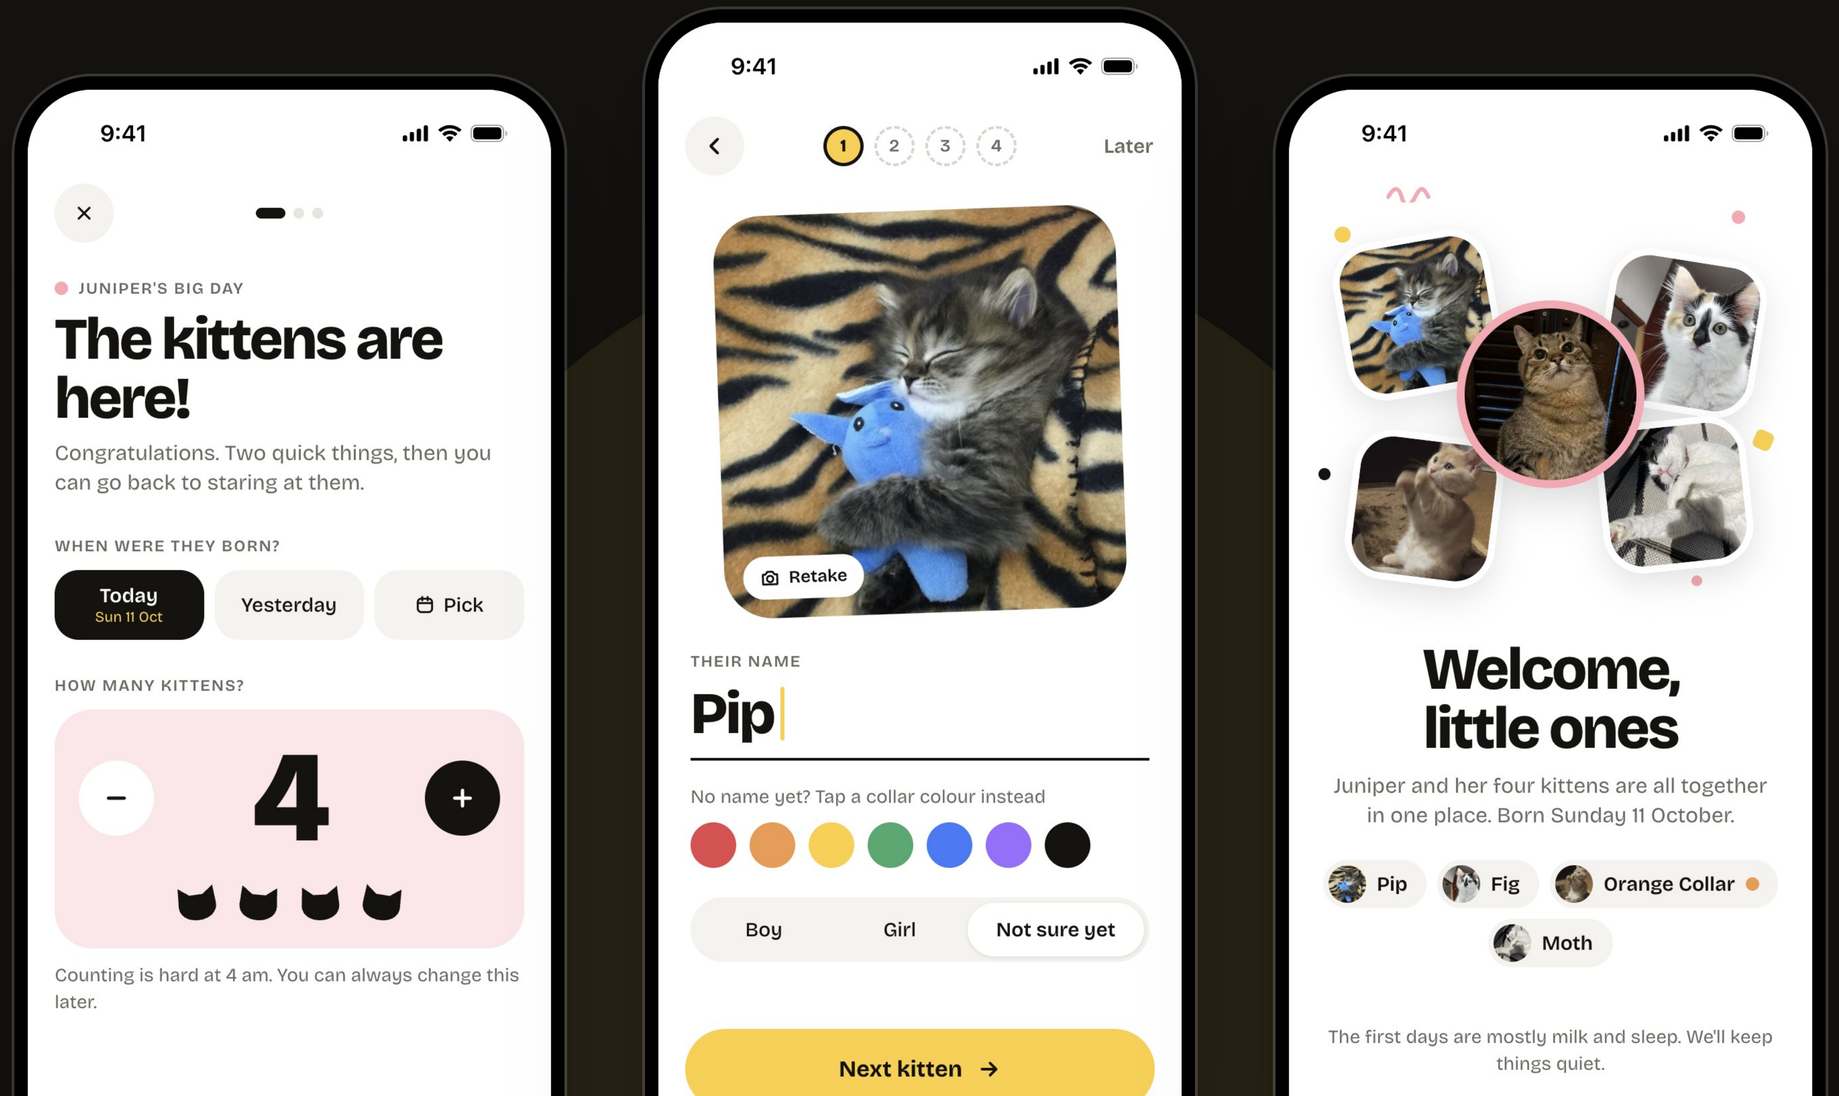

How's she eating? How does she seem? That's the whole check-in.

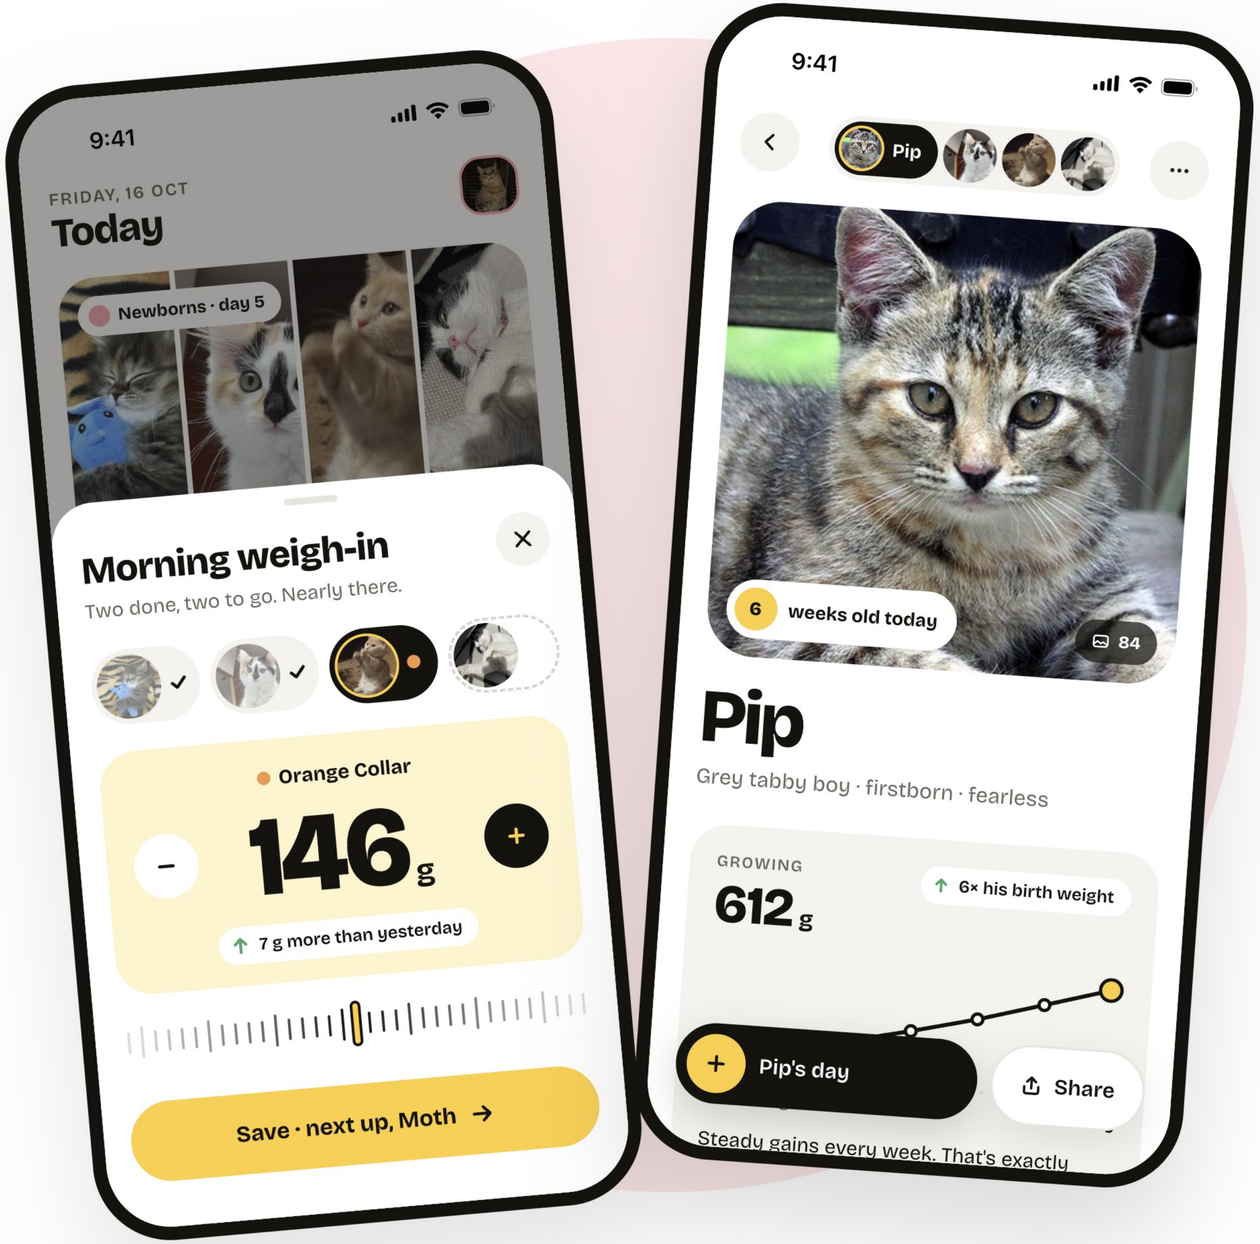

- A loose due window
- This week, in plain words
- A nesting checklist

The big night, one kitten at a time.

Big buttons, zero typing. The details can wait.

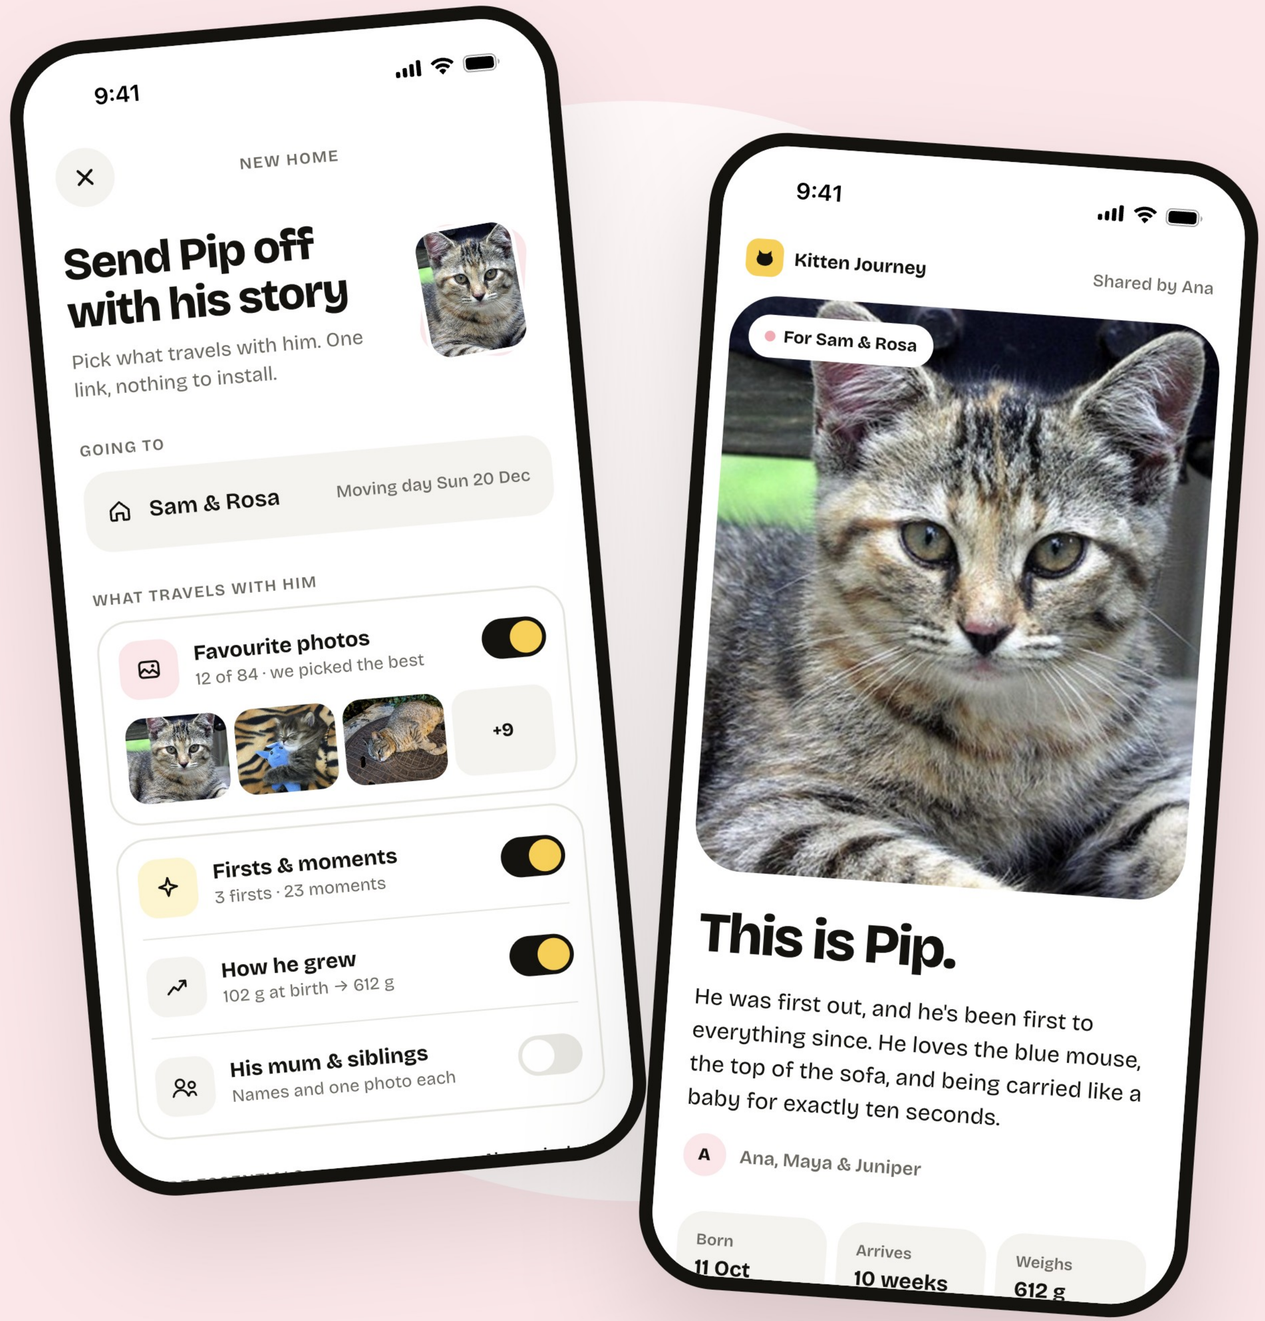

Every gram. Every first.

Weigh the whole litter in under a minute. Each kitten gets their own page.

- **Growth at a glance**
- **Firsts, saved as they happen**
- **Guidance, never a lecture**

Their story goes with them.

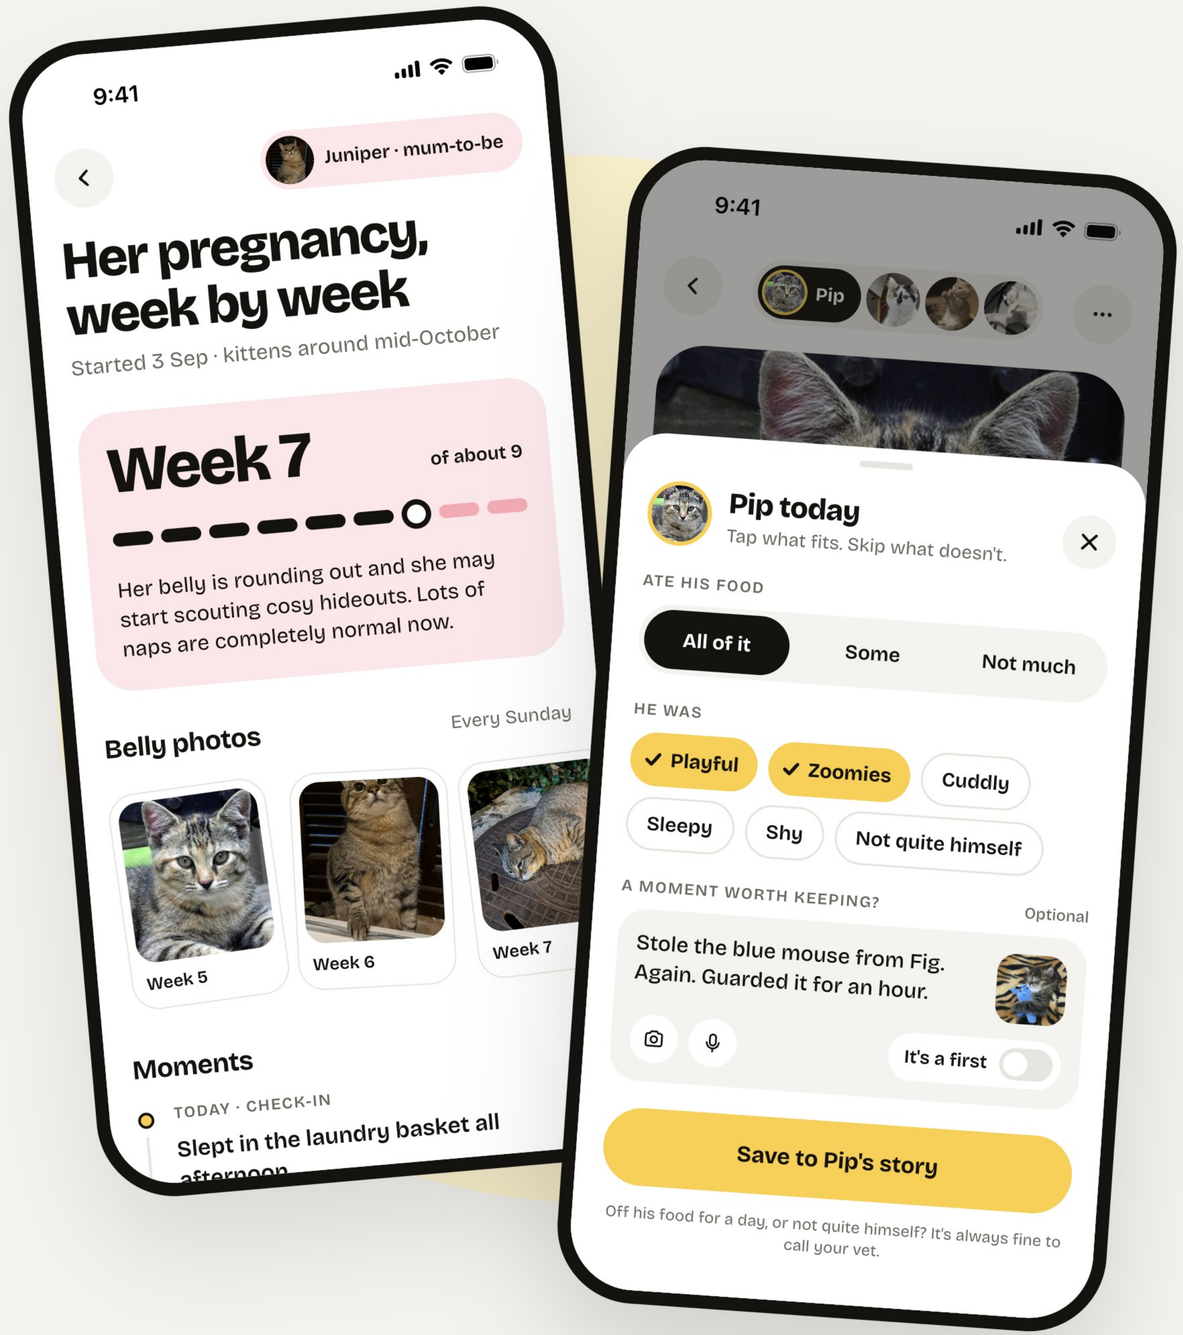

One link for the new family. Nothing to install.

- One link, opens anywhere
- You choose what travels
- A first week, already planned

Calm by design.

Made for one hand, with a kitten in the other.

1
Two taps, not twenty forms

2
Warm, not clinical

3
Everything is optional

4
Knows when to step back

Kitten Journey

1 Would you use it, if your cat was expecting?

Yes, I would | Maybe | Not for me

2 Which moment would you open it for most?

3 What's missing, or what would stop you?

Would you use this?

An early concept. Honest reactions help most.
